Units 24 A,B,C Park Avenue Estate, Luton, Bedfordshire, LU3 3BP
United Kingdom
T: +44 (0)1582 561500F: +44(0)1582 561900

Brass tread insert plates are supplied in 1.83 metre stock lengths for cutting to size on site.

Stair treads should have a slot rebated into them, wide enough to allow for the thickness of the tread plate and to a depth which will leave the plate standing 2mm proud of the surface of the step when glued in.

It may assist the installer to use a sample piece of the profile to establish the correct depth, allowing for the adhesive.

F. Ball & Co. F32 is a suitable adhesive for this purpose. Follow their application instructions. For information on alternatives and specific applications, please contact the sales office for advice.

Access to the staircase should only be permitted when the adhesive has had time to fully cure. See adhesive manufacturers guidelines.
